About Me

I'm currently studying for a BSc Computer Science (Hons) degree at Oxford Brookes University. I'm focusing on self-development, looking to build a character with the adeptness that modern business require from their people in order to thrive.

I encourage you to take a look at my GitHub page. There you will find some of my small personal projects, along with larger pieces of work accompanied by documentation that follows the development process.

Employment History

British Army *Officer Cadet*
Oct 2018—Present

During my time I have developed core military values and expanded my skill set to include leadership, performance under pressure, communication and teamwork.

Wentworth Club *Lifeguard*
Apr 2017—Present

My role ensures both safety and the highest standard of customer experience, as expected form such a prestigious club.

Sue Ryder *Sales Assistant*

I volunteered at a Sue Ryder charity shop for over a year. I developed sales skills, and learnt about what it takes to run a profitable small business.

Technical Skill Set

Object-Oriented Programming Languages
Java

Procedural Programming Languages
Python (& Django)

Web Technologies
HTML5, CSS, Django, Bootstrap

Education

Oxford Brookes University *BSc Computer Science*
Sept 2018—Present | GPA 4.0
Notable modules include: Object Orientated Programming, Data Analytics, Databases, Security Fundamentals, Machine Learning.

Edgbarrow School / Sixth Form
Sept 2011—Jul 2018
A Level (Business B, Computer Science C, Maths D)
11 GCSE A*-C

Mission Statement

Raised in Africa, I developed a global awareness early on. My family has a history of working for organisations with the objectives of advancing technology and/or raising the global standard of life.

The information age is a fantastic opportunity to address many of the problems that the world faces by advancing all industries. Computers are an essential part to almost every aspect of cutting edge research and development. Once I have completed my degree, I hope that the acquired knowledge can be matured and applied in an environment which will allow me to play a part, large or small, in changing the world for the better.

Hobbies & Interests

I enjoy various sporting activities, including football and running. I played football competitively for 7 years, and won the North East Hampshire U18s Premier League title. I now play professionally for my army unit.

I also enjoy reading around the topic of computer science, particularly how the subject can be applied to various disciplines and industries.

Non-Technical Skill Set

Leadership
Negotiation
Teamwork
Customer Service
Communication
Public Speaking

D of E — THE DUKE OF EDINBURGH'S AWARD — GOLD LEVEL
